UI ENGINEER

Web professional with 10 years of experience in frontend development and a primary focus on User Experience and Accessibility within products.

UI ENGINEER SERVICELINK
April 2024 - Present

Create new screens and components using Angular 17+ to match requirements documents as well as designs provided by UX Designers for handoff to the Engineering team. Utilize knowledge of WCAG and Responsive development to create accessible and universal screens even where designs are not provided. Assist Engineers with questions as needed with the User Experience during development. Help conceptualize and build the new component-based Design System for the entire Product and Engineering team.

UI ENGINEER VECTOR SECURITY
June 2023 – April 2024

Utilized React and Optimizely to create or update components, pages, and other UI elements throughout all applicable projects. Integrated provided APIs into the frontend, delivering fully functional components. Maintained clean branches and commit messages using Git. Delivered code changes via pull requests on Microsoft Azure to the appropriate team. Reviewed code changes as required for fellow team members, comment, and assist with changes as needed. Verified successful deployment daily and provide updates to the applicable team members on status.

UI ENGINEER INOVALON
May 2021 – June 2023

Created Angular components to be imported into existing external Aurelia applications. Developed with universal design in mind, taking care to implement WCAG compliance wherever possible. Supported, assisted, mentored, and trained teammates, with a specific focus in onboarding two interns to the team. Followed development standards that were established by the architecture team.

UI ENGINEER SERVICELINK
December 2019 – April 2021

FRONT END DEVELOPER HAIRUWEAR
November 2018 – December 2019

FRONT END DEVELOPER CIBER GLOBAL, LLC
September 2013 – May 2018
